

Welcome home

to high-quality windows and doors

Stylish, durable and secure – and tailor-made for you

Discover

our high-performance PVC-U windows and doors

A window on your world

The look and style of your home says a great deal about you. Doors and windows are a prominent feature on any property and really dictate the character of your home. As well as creating a first impression for visitors, they play a crucial role in weather-proofing, insulating and securing your property.

Installing high-quality PVC-U doors and windows is the best-value home improvement you can make. At a stroke you can improve the appearance, energy efficiency and security of your home – all at an affordable cost.

Styles to suit every home

We can create a complete range of window and door types to suit any home. From classic casement windows to innovative tilt-and-turn styles, plus classic vertical sliders, French windows, entrance doors and bay windows.

High-security system

Our PVC-U windows and doors are durable and robust, giving long-life, low-maintenance performance, with no need for painting or other treatments. They are fitted with high-security locking mechanisms too, giving you the peace of mind that your home is well protected against intruders.

Energy efficient design

Our multi-chambered frame designs deliver exceptional energy efficiency for both windows and doors – helping to keep your home warm and comfortable all year round, as well as reducing your energy consumption. Our slim frames also allow the area of glass in windows to be optimised, maximising the amount of natural light within your home.

Colour-match guarantee

Because all our frames are produced by the same manufacturer – Eurocell – we can assure you that all colours are exactly matched across our entire range of window and door products. It means that our whites are the same white across all products and our woodgrain finishes are all perfectly matched.

No matter what the age, style or size of your property, we can create high-quality windows and doors to enhance and add value to your home.

Windows

Refresh your outlook on the world

Windows are the showcase feature of your home. They determine the character and appearance of your property, whether it's a chic apartment, a traditional Victorian terrace or a stylish new-build house. Windows frame your view of the world from within and define the appearance of your home from the outside.

It's essential to choose windows that complement the style of your home, provide long-life protection against the elements and enhance the security of your property. With our versatile PVC-U windows, you can rest assured that you will find an attractive, secure, energy-efficient style to suit your home.

A question of aesthetics

The contemporary styling of our PVC-U windows includes a slimmer frame, giving a sleek, unobtrusive appearance and maximising the area of glass in your windows. That means more natural light in your home and a clearer view of the outdoors for you.

The aesthetics of your window can be enhanced to match the architectural style of your home with a range of stylish accessories. Georgian bars, mock horn sashes and arch-top inserts can help you to create an individual look that perfectly complements your property.

Framed in style

Our windows are available with two distinctive styles of frame and beading. The chamfered option is a contemporary, straight-edged style, while ovolo sculptured beading gives a more traditional, decorative finish to your window. Both options are available across our entire range of windows, giving you complete flexibility to select your preferred style. You can even mix and match chamfered and ovolo frames to create a unique style all of your own.

Colour your world

Whether you want simple understated windows, a natural wooden look or want to make a bold statement with bright colours that set your home apart, we offer the colour options and finishes to suit your preferences.

*Grey, Golden Oak and Rosewood frames can be supplied with White on the internal surfaces.

Also available, in Ovolo style only

Other colours are available by special order, giving you unlimited scope to create the window style of your choice.

Tilt and turn Chamfered style window in Grey

Energy Efficiency

Good for your pocket - and the planet

Conserving energy in our homes is essential to help reduce energy bills and protect the environment by cutting carbon dioxide emissions. The fact that our homes and buildings are responsible for almost half of the UK's carbon dioxide emissions means that improving energy efficiency in all dwellings is a top priority for the Government and homeowners alike.

Comfortable homes with lower running costs

Windows have a vital role to play in conserving energy in buildings, since 20% of the heat escaping from an average home is lost through its windows.* Choosing the right combination of glazing and window frames is essential to improve the energy efficiency of your home, reduce your energy costs and, crucially, create a comfortable living environment for you and your family – all year round.

Built-in thermal efficiency

Our window frames feature an advanced multi-chambered cross-section which helps to prevent heat loss and enhance thermal efficiency. This means we can create windows that meet the highest energy efficiency ratings.

Windows that make the grade

The British Fenestration Ratings Council Ltd (BFRC) is an independent organisation dedicated to improving the efficiency of fenestration products. BFRC Energy Ratings are a simple, clear and easily understood method of informing customers of the relative energy efficiency of a particular window. The windows are rated on an 'A' to 'G' scale, which is consistent with other products such as lightbulbs and white goods. An 'A' rating signifies the most energy-efficient products, a 'G' the least efficient. Our windows can be designed to achieve any rating on this scale, according to your needs and budget.

Recycled materials

Our windows represent a genuine sustainable option. Not only because they help reduce CO₂ emissions, but also because PVC-U is a fully recyclable material. Each year, tens of thousands of tonnes of PVC-U are recycled, minimising impact on landfill waste sites.

Strength & Security

Protect your property – for life

Your windows play a crucial role in securing your home against unwanted intruders. In addition to being secure, they need to be robust and durable enough to withstand the wear and tear of everyday use – as well as everything the British weather can throw at them.

Designed to endure

When you choose our PVC-U products you have the peace of mind that your windows are built to last. Our window frames have been independently assessed and certified by the British Board of Agrément (BBA) with a life of up to 35 years. Furthermore, all frames come with a ten-year guarantee against discolouration, warping and cracking.

Low-maintenance option

One of the principle benefits of PVC-U windows over any other material is that they require no maintenance, other than the occasional wipe down with a damp cloth – no painting, no preservative treatments, no hassle.

Safe and secure

Protecting your property against unwanted intruders is a primary concern for every homeowner. That's why our windows have been designed to deter burglars and secure your property against forced entry. For a start, all of our windows are internally beaded, which means the glazing units cannot be removed from the outside. That's a major deterrent to burglars. What's more, our windows can be fitted with the most advanced security hardware on the market, including shoot bolts, locking handles, heavy-duty security hinges and hinge guards.

Window Options

Styles to suit every home

Whether you live in a contemporary city-centre flat, a suburban semi-detached or a quaint country cottage, we offer a window style to enhance your home and complement its individual character.

Here's just a sample of the window styles we offer...

Casement windows

This simple and functional window design is ideal for all types of property. It is the most popular and widely used style of window in the UK. Our casement windows can be either top-hung opening or side-hung opening to suit your requirements, providing excellent ventilation and security. You can choose clean-cut chamfered beading or a more decorative sculpted ovolo finish, according to your tastes.

Tilt and turn windows

This sophisticated window style is becoming increasingly popular. It combines the benefits of a large area of glass with ease of cleaning and excellent ventilation. The innovative tilt-and-turn mechanism enables the window to be opened inwards from the top for effective ventilation or from the side for safe and easy cleaning from within your home.

French windows

This classic double-opening window perfectly complements cottage-style properties and creates an interesting feature for any home. With twin opening sashes it allows you to invigorate your home with fresh air and really let the outside in - whilst providing an effective means of fire escape from upper floors. The added advantage of robust PVC-U frames and advanced locking mechanisms means you can now create traditional cottage looks without compromising on security.

Chamfered style bow window in Rosewood

Bay and bow windows

Whether your home features traditional bay or more modern bow-style windows, we can create high-performance, draught-free and secure windows for you. Bay and bow windows open your room up to the outdoors, creating a feeling of space and light. We can enhance this effect by installing slim-framed windows that maximise your glazing area and flood your home with natural light.

Open the door to a new look for your home

Your entrance door is the gateway to your home. It reflects your tastes and creates that all-important first impression. It's important that your entrance door complements the style of your property, but it also needs to be functional and secure – durable enough to withstand everyday use and secure enough to protect your property against intruders.

Our entrance doors, constructed from the same robust PVC-U components as our windows, are the perfect solution, combining aesthetic appeal with practicality and low maintenance.

Entrance Doors

Long-life, low-maintenance solutions

Our entrance doors are designed for long-life performance, even in the busiest households where they are subjected to knocks and scrapes every day. With internal webbing and thick PVC-U walls, our doors are designed to withstand the rigours of everyday use without scratching or denting.

Like our windows, our doors have been independently assessed and certified by the British Board of Agrément (BBA) with a life of up to 35 years. All of our doors also come with a ten-year guarantee against discolouration, warping and cracking.

PVC-U doors require minimal maintenance. They don't need to be painted or treated. Occasional wiping with a damp cloth is all they need to maintain a fresh, good-as-new appearance. Furthermore, PVC-U doesn't warp, swell or crack like other materials, so you can be sure your door will maintain its original appearance and performance for years to come.

Protection against intruders

Security is a primary function of any entrance door. Our doors are fitted with the latest generation of high-security locks to keep your property secure against break-ins. Multi-point locking systems are designed to prevent forced entry and all doors are internally beaded to prevent glazing units or PVC-U panels being removed from the outside.

Protection against the elements

PVC-U doors offer exceptional protection against the elements. Air-tight seals keep out any drafts and effective drainage channels ensure there are no leaks. Our range of doors also offers excellent thermal efficiency, ensuring heat is retained in your home and helping to keep your energy bills down.

Door Options

Make a stylish entrance

Whatever your tastes and no matter what style of home you live in, we offer an entrance door to meet your requirements. Our durable, attractive PVC-U doors are available in a huge variety of styles, colours and finishes.

Tailored to your needs

You can choose from half-glazed or fully glazed doors, with panels and glazing in a range of styles and configurations. You can also add decorative touches, such as ovolo or chamfered beads and Georgian bars, to suit your home.

Sidelight solutions

For wider openings you can choose from a range of attractive sidelight window options to complement your entrance door. Your door and adjacent side windows can be fabricated as a single unit to give clean aesthetic lines.

Universal appeal

You can rest assured that your door will match precisely with any windows supplied by us, since they are all fabricated from the same high-quality PVC-U system from the same manufacturer.

Low threshold for easy access

Our doors are available with a low threshold to provide easy access for everyone and to minimise tripping hazards. Our low-threshold doors comply fully with Part M of the Building Regulations and the Disability Discrimination Act (DDA).

Colours and finishes

A wide choice of colours and woodgrain finishes is available for our doors and door frames. The door frame colour options available are:

* Grey, Golden Oak and Rosewood frames can be supplied with white on the internal surfaces

Also available, in Ovolo style only

In addition to these colours, doors are also available in:

Sustainability

PVC-U - the sustainable choice

For many years, PVC-U windows and doors have been recognised as the durable, low-maintenance and energy-efficient option. Now, thanks to recent advances in recycling, PVC-U windows and doors are the first choice material for sustainability too.

'A' rated for sustainability

PVC-U windows have achieved the highest rating possible in the Building Research Establishment (BRE) Green Guide to Specification (June 2008) – a key reference tool for housebuilders. In the guide, PVC-U windows received an 'A' rating for residential properties and an 'A+' rating for commercial buildings.

Re-useable and recyclable - for hundreds of years

Research has shown that 95% of 'post-consumer' or end-of-life PVC-U windows can be recycled. When combined with an official product life for a PVC-U window or door of up to 35 years (BRE), and much longer unofficially, the result is hundreds of years of re-use with minimal impact on the environment.

Environmentally responsible component supplier

Eurocell, which manufactures all of the PVC-U components used in our windows and doors, is at the forefront of sustainable developments in the PVC-U industry. The company re-uses virtually 100% of its waste product in the manufacturing process, which amounts to around 3,000 tonnes per year, and buys waste product from other sources for recycling. The result is virtually zero Eurocell production waste going to landfill.

“It means that choosing to buy your PVC-U windows and doors from us is good for your home, your pocket - and the environment.”

High quality windows and doors

Stylish, durable and secure - and tailor made for you
